## GREEN POLICY

Surya Sen Mahavidyalaya was established in the year 1998 with degree course in Arts, Science and Commerce and since then imparting quality education to students. The mission of the college is to generate responsible individual conscious of his duties towards society, nation and environment. The college is situated in a 1.9 Acres of land and is currently occupied with five buildings, playground cum open auditorium for function/programme, small garden, compost pits and trees.

## OBJECTIVES

- Use of alternative source of energy in the campus, office automation,
- To sensitize the students about environmental pollution (air, water, soil, noise, space) and hazards;
- To encourage students to take initiative to plant trees and nurture them;
- To adopt environment friendly practices like use of jute bags, avoid wastage of water, electricity, 3 Rs – reduce, reuse & recycle
- To encourage the students to keep environment safe and clean.

## ENVIRONMENT FRIENDLY MEASURES

### 1. ENVIRONMENT POLICY OF THE INSTITUTION

Surya Sen Mahavidyalaya maintains the greenery policy in the campus. The college has 'Pedestrian Friendly' pathways. 0.76 acres of land is used for landscaping with trees and varieties of plants. Medicinal herbs are planted in the garden. Degradable waste from canteen and surrounding are used for composting. Important Days like World Environment Day, Earth Day, Ozone Day, Wet Land, etc. are observed in the institution. Students' participation is

encouraged in plantation programme. Environmental sensitisation programme like 'Ban Mahotsav', river cleaning, road cleaning beyond the college area, birds watching activity, seminar, workshop, wall magazine, invited talks, rallies is organised by many Departments, Eco Club, Life Skill & Well Being Cell, Women Cell & ICC, NSS, NCC throughout the academic session.

## 2. WASTE MANAGEMENT

- For degradable waste management the institution has facilities for compost at the backyard of the canteen and the manures are utilized in the garden.
- Separate waste bins for recyclable and degradable waste are kept for easy collection and disposal system. The Siliguri Municipal Solid Waste Management collects them on daily basis.
- Students are encouraged to collect plastic bottles and single use plastic which are sent for recycling.
- Papers are reused and then recycled. Due to office automation, there is less use of papers for notices, circulars, etc. for official usage. Maintenance of employee's daily register, application of leave and self-appraisal diary are done in electronic means through SSM auto App.
- For study materials, assignments, previous question papers are available in the e-NGAGE portal in college website. Students' seminar presentation, notices are mostly done on platform.
- Annual E-waste or broken electronic equipment are often repaired and reused as much as possible and in case of beyond repairable condition are sent for recycle so that the metals can be utilized for other works.
- Sanitary vending machine and incinerator for the disposal of sanitary napkins are installed in the Girls' Common Room
- " Ban on use of Plastic, No Smoking, No Tobacco" boards are displayed at various places in the campus,
- Disposal of e-waste through authorized vendors. The institution intends to adopt the

Buy Back policy.

- The Institution's Science laboratory chemical waste is carefully disposed through a separate pipe into a separate chamber for its safe disposal

### 3. MAINTENANCE OF WATER BODIES AND DISTRIBUTION SYSTEM

- The College has proper sewage and drainage system
- Reuse the water coming out RO water purification systems
- Rain water harvesting
- Bore well recharge
- Construction of tanks
- Maintenance of water flow and control of overflow is monitored

### 4. REDUCE ENERGY CONSUMPTION

- The college uses LED bulbs / Tube lights
- Photovoltaic cells are installed as an alternate renewable source of energy
- Computers are used with power saving mode
- Switches are shut down after occupancy time
- 50 KV Solar Panels is installed in the roof top of two buildings and sensor-based LED solar power street lights to minimize the emission of CO<sub>2</sub>
- Switch off drills are conducted
