11) Please write in brief (within 500 characters) about any suggestions to the college authority.
57 responses

Please make college central library books more accessible to students using computers if at all possible.

The course content should be made more updated and relevant to the changed world scenario.

1. A consolidated and basic experimental research infrastructure may be setup that will act as a seed for procuring research grants and improving research activities (for science departments).
2. Departmental libraries may be improved further.
3. College authorities may think of providing independent computational facilities to relevant departments.

If possible please increase the time period of borrowing books to three months.

Pleased with infrastructure facilities provided by College Authority like modern interactive panels to name one of them. As one of the Subject of Commerce is Computer Applications in Business so requirement of a computer Laboratory is needed.
